

Your Source of Truth

More than just software, **Verity for Medical Groups** is your comprehensive, automated solution for all your credentialing, validation, and enrollment needs.

About Verity for Medical Groups

On average, approximately 18 payer applications need to be processed for every provider during each 3-year enrollment cycle. If your practice has 50 providers and you spend 6 hours collecting and validating data for each enrollment application, your medical group could be burning roughly 1,800 hours per year on enrollment paperwork alone. Whether you are a medical group of cardiologists, surgeons, dentists, physical therapists, or specialty care providers, or you provide medical billing, coding, or medical management services to these types of practices, you need a single system – built around the best content, data, and practices – to manage all your credentialing, validation, and enrollment needs.

Medical Groups consist of distinct care settings with distinct needs

At Verity, we're bringing unique content and functionality to these care settings:

Primary and Specialty Care Practices

Verify licensure, education, and sanctions/exclusions through Verity's plug-ins with over **1,500 databases** to deliver real-time verification abilities with primary sources, including: state medical boards, the National Student Clearinghouse, various accrediting bodies, OIG/SAM, and the Social Security Death Master File.

Physical Therapy Clinics

Electronically update your therapists' data through Verity's integration with CAQH's ProView.

Dental Offices and Groups

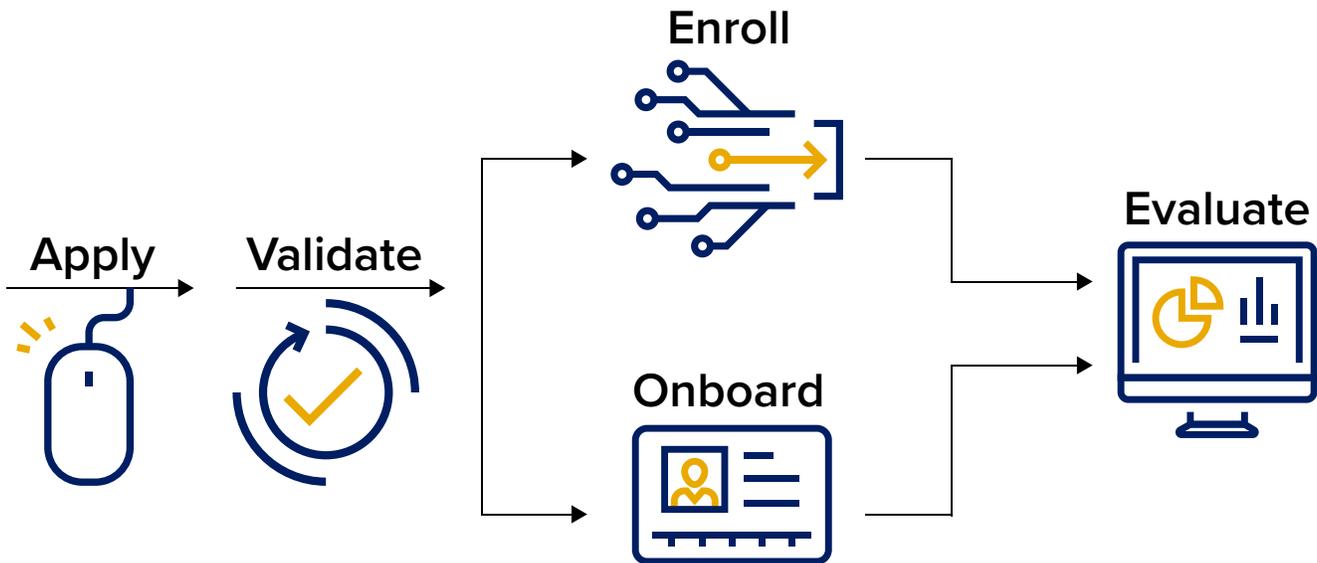

Rapidly enroll with payers using Verity's **900+ pre-formatted payer applications** for dentists, accelerating time to revenue.

Revenue Cycle Management Services

Serve a wider variety of customers with Verity's library of nearly **5,000 payer applications** and submit data to online enrollment sites including commercial payers, dozens of Medicaid sites and PECOS.

Our Solution

Verity has you covered with an enterprise-wide, SaaS solution that enables everyone in your organization to collaboratively manage the entire provider lifecycle.

hStream™

Verity™

A powerful solution that unites platform, content, data, services, and community to transform Verity delivers a single infrastructure that serves as a foundation for managing the entire provider lifecycle.

hStream™

An ecosystem built to extend and optimize the power of Verity, delivering a powerful, secure connective tissue that accelerates data flow, drives enterprise standardization, and enables you to maintain an accurate master provider database.

Our Solution

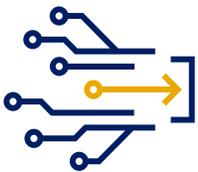

Apply

Allows your providers to digitally add and update their own data through a secure, intuitive portal.

Validate

Eliminates the labor-intensive, time-consuming processes required to validate and monitor license, sanction, and exclusion data for your entire workforce.

Enroll

Automates the provider enrollment process with the largest library of preformatted forms (incl. CAQH, PECOS and Medicaid) that populate in seconds.

Onboard

Ensures the best possible provider experience and a rapid onboarding process with a one-stop shop for your team.

Evaluate

Automates the comprehensive management of provider competency, allowing medical groups to improve the quality of care delivered.
